

SCRUM LAB 2 – SUBMISSION

Inter-City Freight Load Matching Marketplace

Jira Space: FreightMatch

Name: Piyush G Nadgir

SRN: PES1UG24AM190

1. Project Overview

This document contains the Jira evidence screenshots for the SCRUM Lab 2 assignment for the FreightMatch freight load matching marketplace. The screenshots demonstrate sprint planning, story-point estimation, sprint execution, progress tracking, and the Sprint Burndown Chart.

2. Submission Evidence Checklist

Requirement	Evidence / Status
Epics and User Stories	Created in Jira
Story Points	Assigned to the user stories
Sprint 1	One-week sprint with simulated progress
Sprint 2	One-week sprint with simulated progress
To Do → In Progress → Done	Shown in sprint board screenshots
Burndown Chart	Sprint 2 burndown chart included
Summary	Summary screenshot should be added if required by the instructor

3. Story-Point Estimation

The Jira screenshots show Story Points assigned to the stories. The Sprint 2 backlog capture also shows the remaining stories and their estimates.

4. Jira Screenshots

Figure 1. Sprint 1 – work distributed across To Do, In Progress and Done

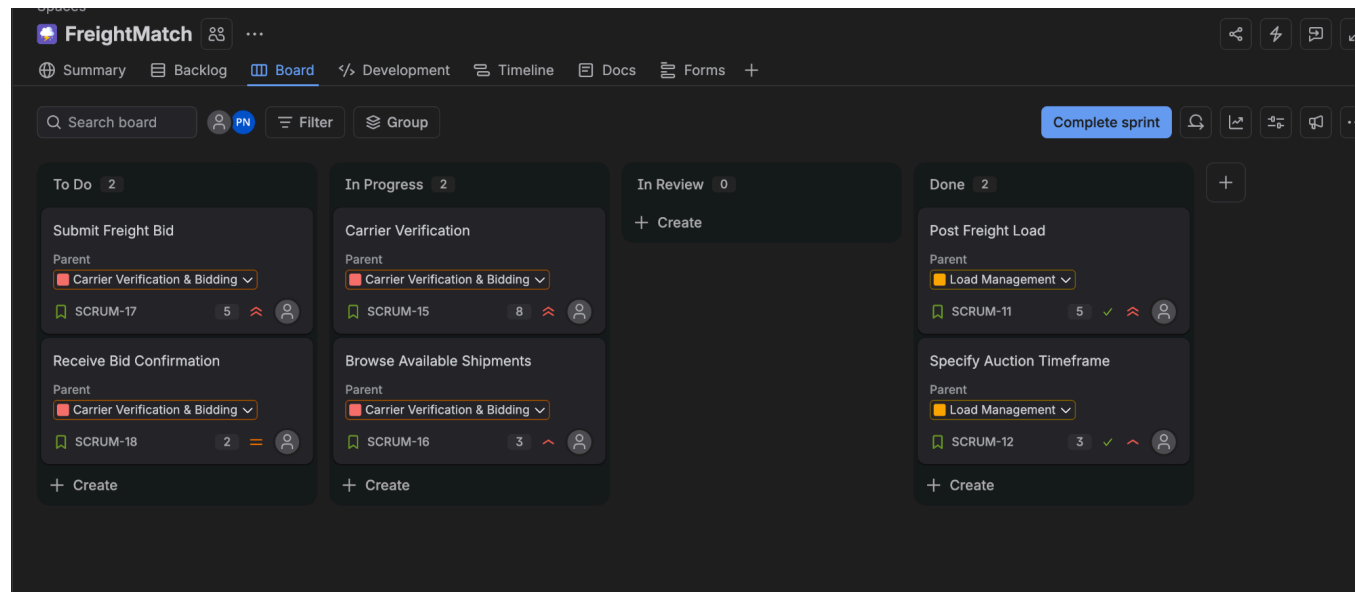

Figure 2. Sprint 1 – initial sprint board

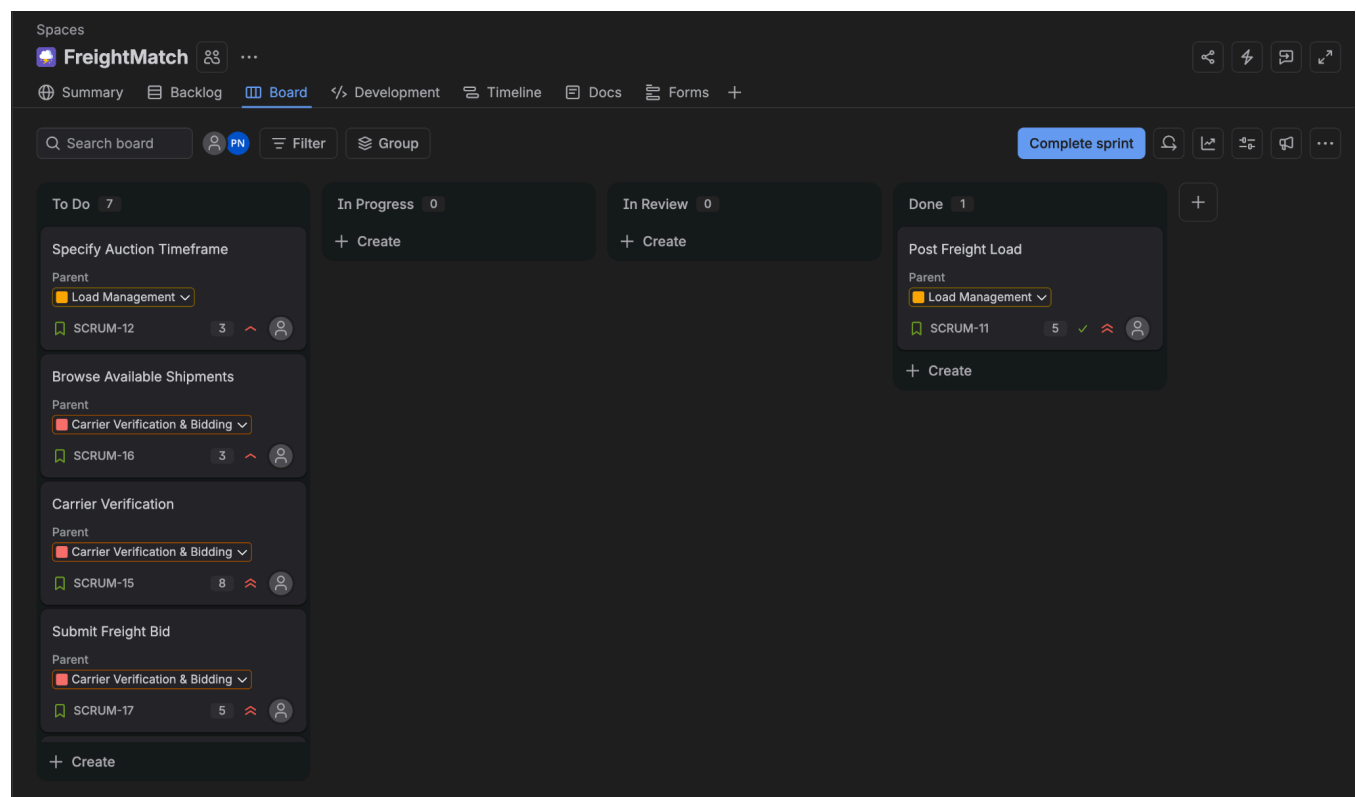

Figure 3. Sprint 1 – completed work

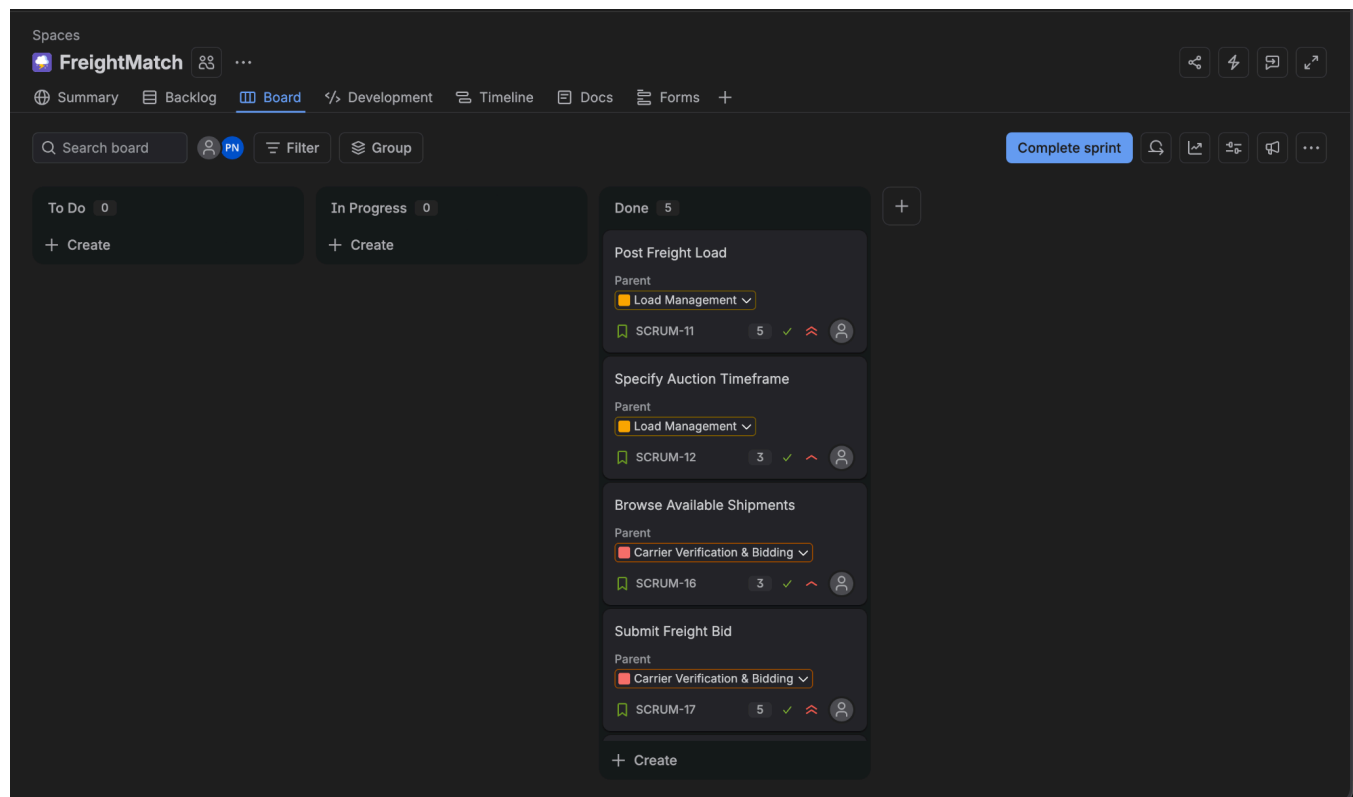

Figure 4. Sprint 2 – sprint backlog and story-point estimates

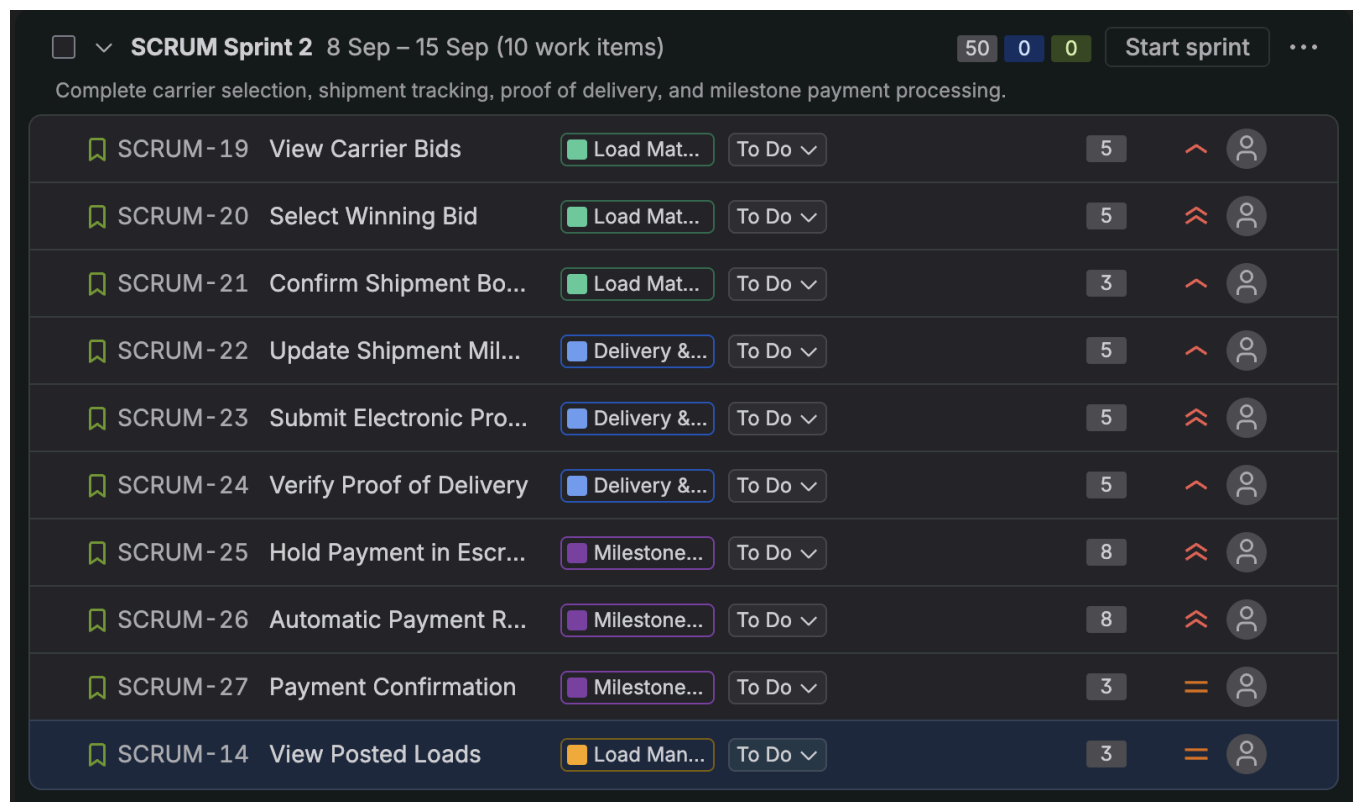

Figure 5. Sprint 2 – work distributed across To Do, In Progress and Done

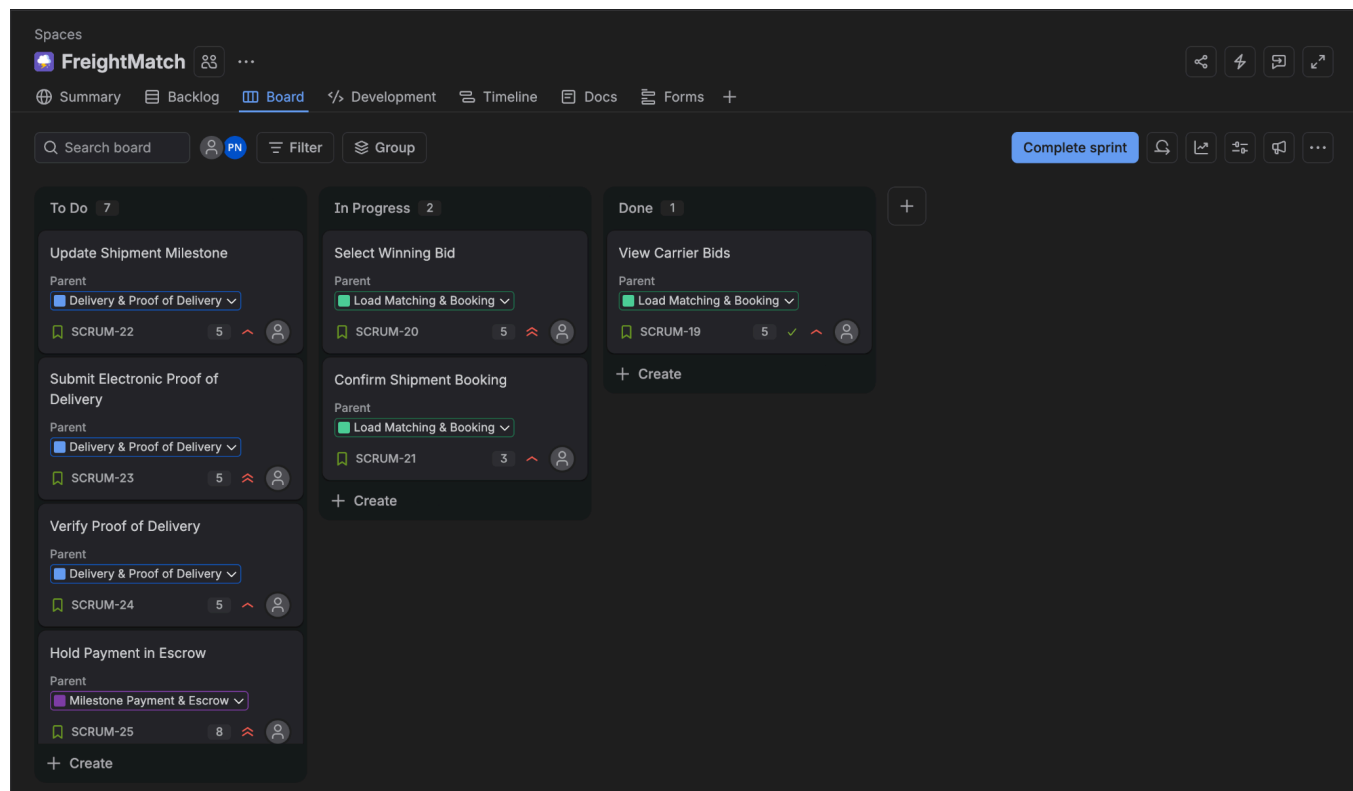

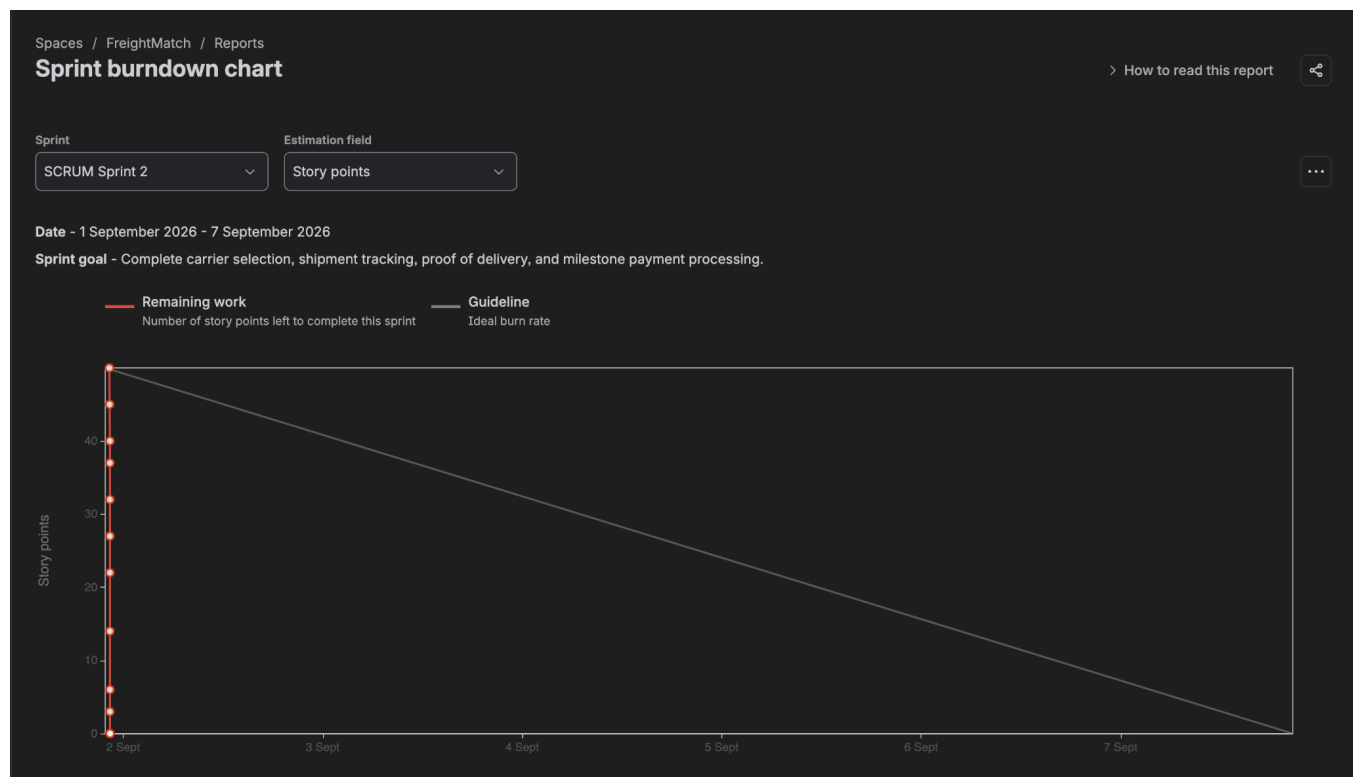

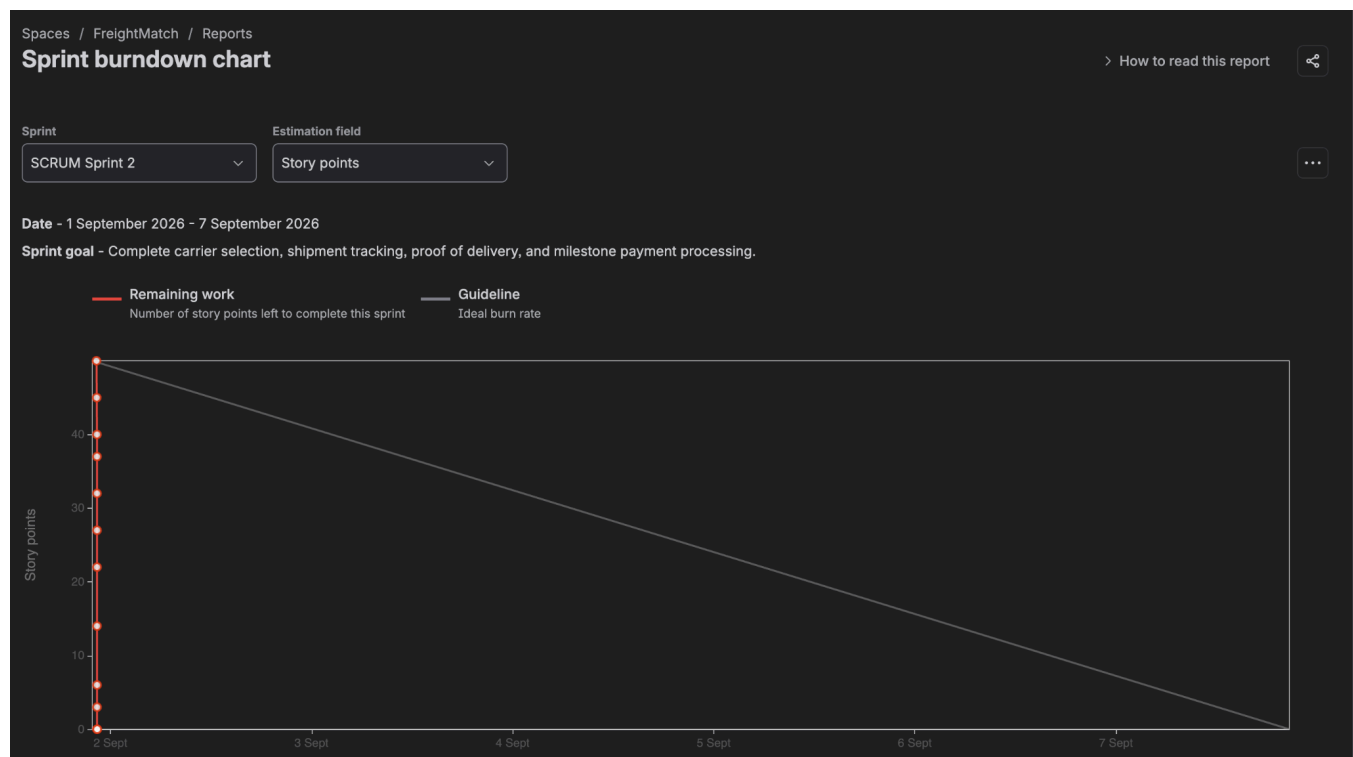

Figure 6. Sprint 2 – burndown chart

Appendix – Additional Burndown Capture

Sprint 2 – burndown chart (additional capture)

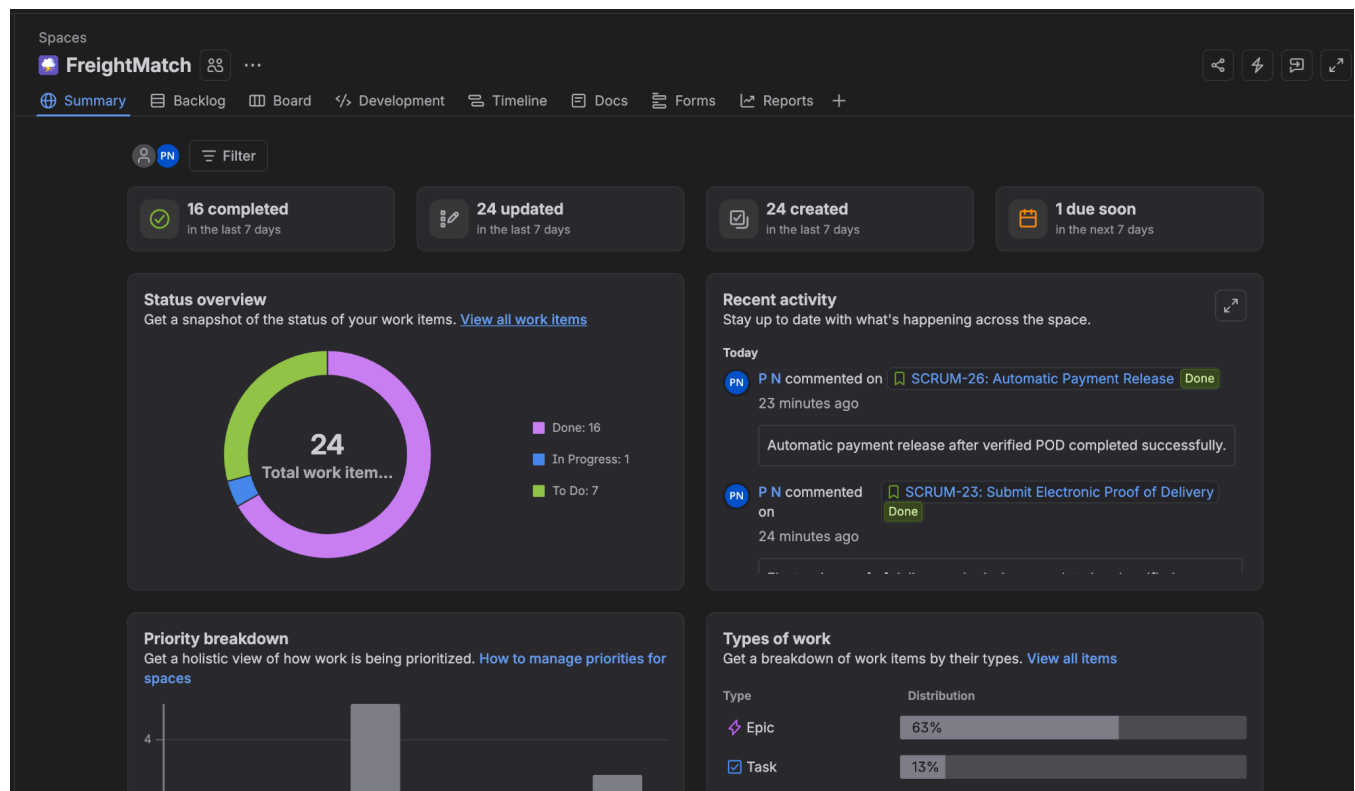

5. Final Submission Note

Before submitting, add the Summary-page screenshot if the instructor requires it as a separate image. The uploaded evidence already includes sprint-board progress and the Sprint 2 Burndown Chart.

5. Jira Summary

The Jira Summary page provides the final project status overview, including completed work items, current status distribution, recent activity, and priority/type breakdowns.

Submission note: This document now includes the uploaded Jira Summary screenshot along with the sprint and burndown evidence.

6. Epics – Summary and Description

The following table documents the five Epics used for the FreightMatch Jira project. The Epic names are the ones shown in the submitted Jira screenshots. The descriptions are concise project descriptions aligned with the Inter-City Freight Load Matching Marketplace scenario.

Epic No.	Epic Summary / Name	Description
Epic 1	Load Management	Manage the creation and configuration of freight loads, including posting shipment details and defining the auction timeframe.
Epic 2	Carrier Verification & Bidding	Verify carrier eligibility and support the process of browsing available shipments, submitting freight bids, and receiving bid confirmation.
Epic 3	Load Matching & Booking	Support carrier-bid review, selection of the winning bid, and confirmation of the freight shipment booking.
Epic 4	Delivery & Proof of Delivery	Track shipment milestones and support electronic proof-of-delivery submission and verification.
Epic 5	Milestone Payment & Escrow	Hold shipment payments in escrow and release payment automatically after verified proof of delivery, with payment confirmation.

7. Group Reflection

During the Scrum exercise, the backlog was divided into Epics and User Stories and Story Points were assigned to estimate relative effort. The Stories were then prioritized and completed through two simulated one-week Sprints. Moving work from To Do to In Progress and then Done helped demonstrate how a Scrum board tracks progress. The Burndown Chart provided a visual view of remaining Story Points, while the Summary page showed the overall status and recent activity. A key learning from the exercise was that clear backlog prioritization, realistic estimation, and regular progress tracking are important for successful sprint planning and delivery.

8. Final Submission Checklist

- ✓ Epics and User Stories – screenshots/evidence captured.
- ✓ Story Points – assigned to the User Stories.
- ✓ Priorities and backlog ranking – completed.
- ✓ Sprint 1 – created, simulated through progress stages, and completed.
- ✓ Sprint 2 – created, simulated through progress stages, and completed.

- ✓ Sprint duration – Sprint 1 and Sprint 2 set as one-week sprints.
- ✓ Sprint board evidence – To Do, In Progress/Progress, and Done shown.
- ✓ Burndown Chart – included.
- ✓ Summary – included.
- ✓ Group Reflection – included in this document.
- ✓ Epic Summary/Description table – included in this document.
